

Check the last reboot via the Command Prompt (MS Windows 10 or above):

[See here for more info.](#)

1. Open `Event Viewer` from the `Start Menu` :

`Windows Start Menu -> Event Viewer`

2. In the far right pane, select `Create Custom View` .

3. `Logged:` Drop-down menu -> `Last 30 days` .

4. `By log | Event Logs:` -> Drop-down menu -> `Windows Logs` (`Check`)

5. Under the `<All Event IDs>` , add `6009` .

6. Press `OK` .

7. `Name:` Change `New View` to `Boot Time`

8. Press `OK` .

9. See the last 10 "Boot Time" events that took place within the past 30 days from the Event Viewer's far left pane:

`Windows Start Menu -> Event Viewer -> Custom Views -> Boot Time`

The LAST Boot Time via the Command Prompt (NOTE: Only the "LAST" boot time):

```
systeminfo | find /i "Boot Time"
```

Or,

```
systeminfo | find "System Boot Time" | more
```
